JOURNEY RISK MANAGEMENT (JRM) STUDY

Salem Terminal to SRI RATHINAM AGENCIES

Objective of the JRM Report

This JRM report is designed to ensure compliance with the Central Motor Vehicle Rules, 1989 (CMVR), AIS 140 standards, and the Road Transport Safety Policy (RTSP). It provides a comprehensive risk assessment for the transportation of hazardous materials along specified routes. By integrating these legal frameworks, the report offers a broad strategy for identifying and mitigating route-specific risks.

Regulatory Compliance

The report complies with the Central Motor Vehicles (Eleventh Amendment) Rules, 2022, mandating safe transportation practices for N2 and N3 category vehicles carrying hazardous materials. These rules require detailed route assessments, especially regarding road conditions, speed limits, and risk areas, to ensure safety compliance.

Risk Management Strategy

This report categorizes transportation routes into high-risk and medium-risk areas, with a focus on factors such as sharp turns, accident-prone regions, and elevation changes. The goal is to provide actionable

recommendations to minimize these risks, including speed regulations, driver warnings for hazardous zones, and the option of alternate routes.

Compliance with the Road Transport Safety Policy (RTSP)

The report integrates RTSP provisions, including mandatory driving hours, rest periods, and nighttime driving restrictions. It ensures that drivers follow official guidelines, such as taking prescribed rest breaks and avoiding dangerous road conditions like poor visibility, heavy crowds, or high-traffic areas during peak hours.

Emergency Preparedness and Response

The report highlights the significance of predetermined emergency stops for refueling, rest, and overnight stays. It includes protocols for safe responses to road hazards, alternative routes, and rerouting processes if roads are closed or severe weather arises. This aligns with the RTSP emphasis on driver safety and rapid emergency response.

Environmental Considerations

The JRM report addresses environmental risks along the route, ensuring compliance with environmental protection laws in ecologically sensitive zones. It suggests strategies such as identifying areas near water bodies, forests, or populated regions and implementing safety measures to minimize environmental impacts during transport.

Journey Risk Mitigation

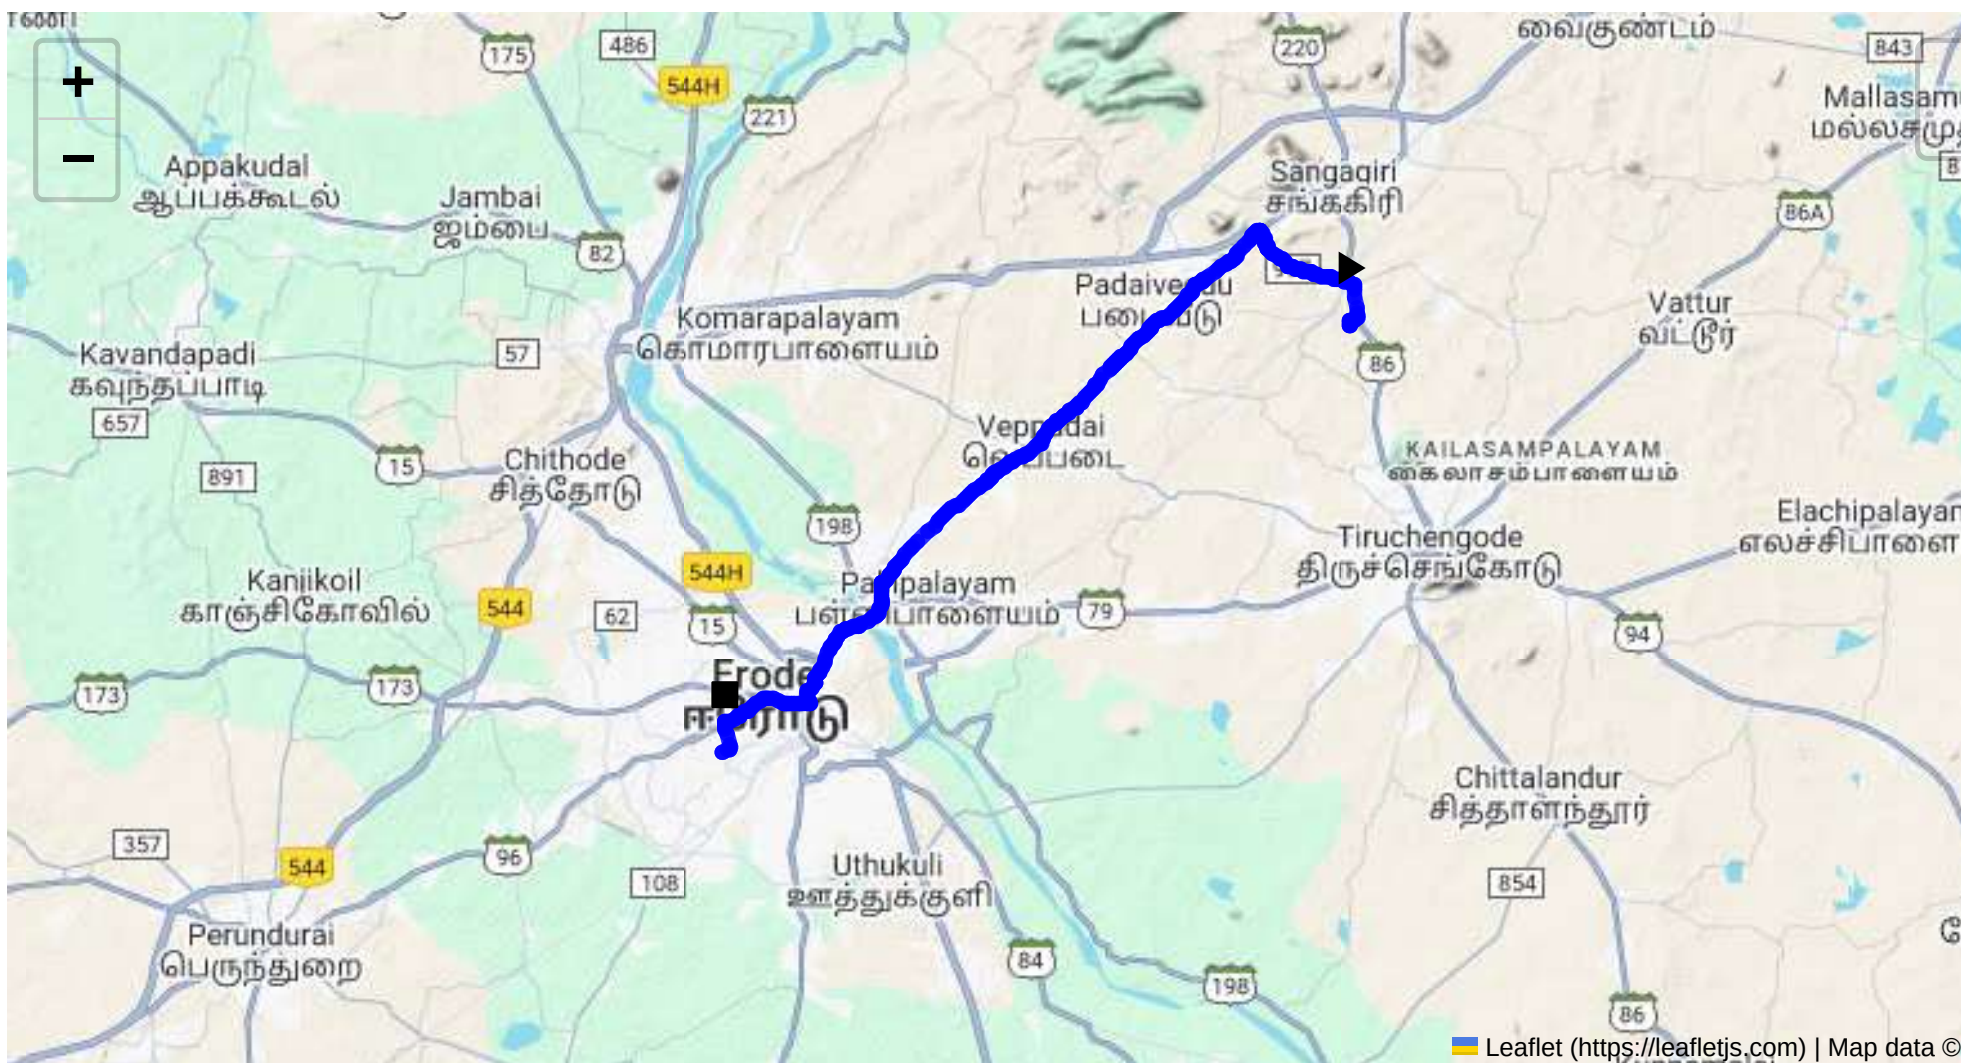

The report includes route-specific risk assessments, detailed journey charts, and defensive driving guidelines for each transport route. Integration with vehicle tracking systems guarantees real-time warnings on hazardous areas, speed limits, and mandatory stops, consistent with RTSP and CMVR safety norms.

Compliance with Government Directives

This report fully adheres to governmental directives regarding hazardous material transportation, implementing mandatory speed limits, nighttime driving restrictions, and comprehensive driver briefings and real-time alerts about route-related risks.

Route Summary:
Total Distance: 28.28 km
Estimated Duration: 0.8 hours
Adjusted Duration (Heavy Vehicle): 1.0 hours
Start: (11.4381, 77.8734)
End: (11.3266, 77.7057)

Welcome to the Journey Risk Management Study

1. Overview of the Route Map

The route from CVQF+23W, Sangagiri to 18/3, Kaliyansundram St, Erode takes you through a mix of rural and urban settings. The journey of approximately 28.28 kilometers involves traveling on several highways and local roads, with a significant portion on State Highway 196 (SH-196) before transitioning onto Brough Road in Erode.

2. Typical Weather Conditions and Potential Weather-Related Hazards

Tamil Nadu, including the Sangagiri and Erode regions, typically experiences a tropical climate. The weather can vary seasonally, with:

- **Summer (March to May):** High temperatures and potential for heat waves, which can impact vehicle performance.
- **Monsoon (June to September):** Heavy rainfall can lead to slippery roads and potential flooding, especially in low-lying areas.
- **Winter (November to February):** Mild conditions, but occasional fog, particularly early in the morning, can reduce visibility.

3. Analysis of Traffic Patterns

- **Peak Hours:** Traffic generally peaks during morning hours (8:00 - 10:00 AM) and evening hours (5:00 - 7:00 PM).
- **Congestion-prone Areas:** Erode town, particularly around Brough Road, often experiences congestion due to commercial activity and narrow lanes.

4. Assessment of Road Quality and Infrastructure

- **SH-196:** Generally well-maintained with adequate signage and lane markings, but caution is advised due to occasional potholes and roadwork, particularly post-monsoon season.
- **Brough Road:** Urban road, moderate upkeep with high traffic volumes. Watch for pedestrians and vehicles entering from side streets.

5. Suggestions for Alternative Routes for Emergencies

In case of road closure or severe traffic, consider:

- **Alternative Highway:** Use the NH544 for a portion of your journey to bypass Erode town, reconnecting to inner roads via less congested areas.

6. Summary of Local Regulations Affecting Hazardous Material Transport

- **Truck Entry Timings:** Restrictions may apply in Erode town during peak traffic to minimize congestion.
- **Permit Requirements:** Ensure all necessary permits for hazardous material transport are secured, complying with local and state regulations.

7. Overview of Historical Incidents Involving Heavy Vehicles or Hazardous Materials

While specific incidents within this route are not extensively documented, Tamil Nadu highways generally have seen accidents involving heavy vehicles due to speeding and poor visibility conditions.

8. Environmental Considerations and Sensitive Areas

- Eco-Sensitive Zones:** Be mindful of agricultural lands near the route.
- Noise and Emissions:** Comply with regional guidelines for noise and emission levels, particularly in urban crossings and near residential areas.

9. Analysis of Communication Coverage

- Network Reception:** Generally strong along SH-196 and within Erode town, but rural segments near Sangagiri might experience brief coverage gaps.

10. Estimated Emergency Response Times for Different Route Segments

- Rural Segments:** Emergency response times may range from 20-40 minutes due to distance from major towns.
- Urban Areas:** Erode provides faster emergency services with expected times of 10-20 minutes.

11. Overall Summary of Risk Assessment

The journey from Sangagiri to Erode involves manageable risks, with primary concerns around weather conditions and urban traffic congestion. Proper planning regarding timing and route familiarity is essential, alongside adhering to local regulations for transporting hazardous materials. Monitoring weather forecasts and ensuring proper vehicle maintenance are also crucial for a safe journey. Additionally, maintaining updated communication tools will mitigate risks associated with potential dead zones.

Risk Assessment - Turns

	Risk Type	Risk Level	Coordinates	Speed Limit
0	Roundabout	High	11.37086, 77.74828	15 KM/Hr
