

JOURNEY RISK MANAGEMENT (JRM) STUDY

Salem Terminal to SRI RAM AGENCIES

Objective of the JRM Report

This JRM report is designed to ensure compliance with the Central Motor Vehicle Rules, 1989 (CMVR), AIS 140 standards, and the Road Transport Safety Policy (RTSP). It provides a comprehensive risk assessment for the transportation of hazardous materials along specified routes. By integrating these legal frameworks, the report offers a broad strategy for identifying and mitigating route-specific risks.

Regulatory Compliance

The report complies with the Central Motor Vehicles (Eleventh Amendment) Rules, 2022, mandating safe transportation practices for N2 and N3 category vehicles carrying hazardous materials. These rules require detailed route assessments, especially regarding road conditions, speed limits, and risk areas, to ensure safety compliance.

Risk Management Strategy

This report categorizes transportation routes into high-risk and medium-risk areas, with a focus on factors such as sharp turns, accident-prone regions, and elevation changes. The goal is to provide actionable

recommendations to minimize these risks, including speed regulations, driver warnings for hazardous zones, and the option of alternate routes.

Compliance with the Road Transport Safety Policy (RTSP)

The report integrates RTSP provisions, including mandatory driving hours, rest periods, and nighttime driving restrictions. It ensures that drivers follow official guidelines, such as taking prescribed rest breaks and avoiding dangerous road conditions like poor visibility, heavy crowds, or high-traffic areas during peak hours.

Emergency Preparedness and Response

The report highlights the significance of predetermined emergency stops for refueling, rest, and overnight stays. It includes protocols for safe responses to road hazards, alternative routes, and rerouting processes if roads are closed or severe weather arises. This aligns with the RTSP emphasis on driver safety and rapid emergency response.

Environmental Considerations

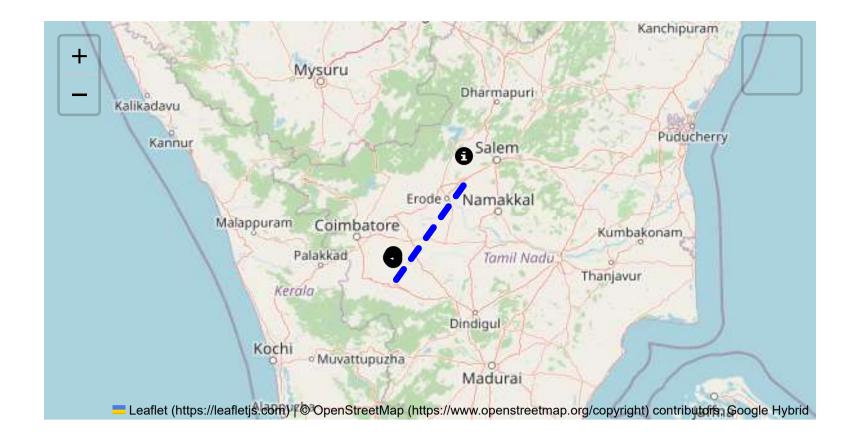

The JRM report addresses environmental risks along the route, ensuring compliance with environmental protection laws in ecologically sensitive zones. It suggests strategies such as identifying areas near water bodies, forests, or populated regions and implementing safety measures to minimize environmental impacts during transport.

Journey Risk Mitigation

The report includes route-specific risk assessments, detailed journey charts, and defensive driving guidelines for each transport route. Integration with vehicle tracking systems guarantees real-time warnings on hazardous areas, speed limits, and mandatory stops, consistent with RTSP and CMVR safety norms.

Compliance with Government Directives

This report fully adheres to governmental directives regarding hazardous material transportation, implementing mandatory speed limits, nighttime driving restrictions, and comprehensive driver briefings and real-time alerts about route-related risks.

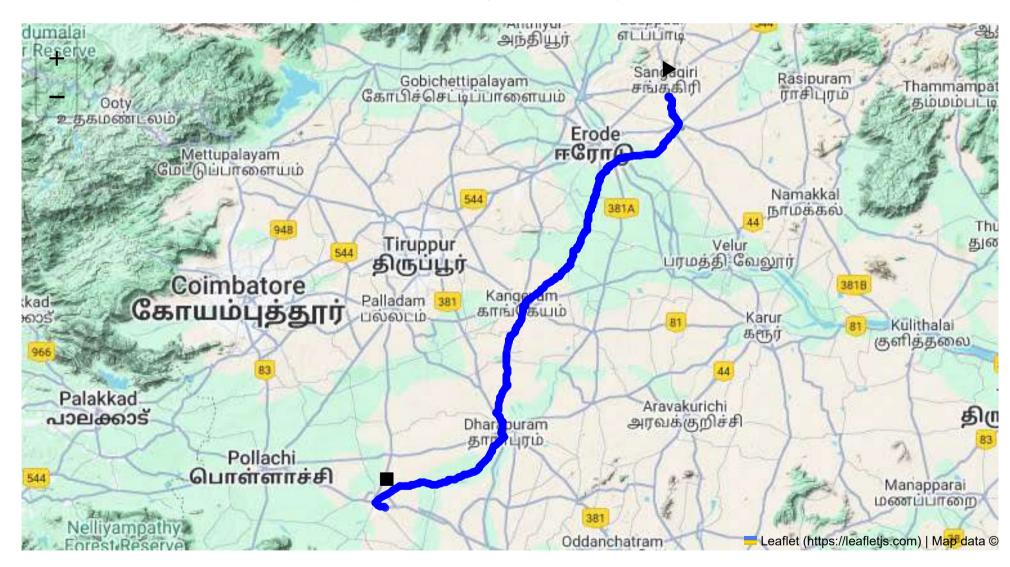

Route Summary:

Total Distance: 142.82 km

Estimated Duration: 3.2 hours

Adjusted Duration (Heavy Vehicle): 4.0 hours

Start: (11.4381, 77.8734) End: (10.577827, 77.26963)

Risk Spots

	RiskSpotType	Coordinates	Speed Limit	Distance from Start
4	Turn	11.43968, 77.87345	15 KM/Hr	0.09 km

Welcome to the Journey Risk Management Study

Route Map Overview

The route from Sangagiri to Udumalaipettai spans approximately 142.82 kilometers. Starting in Sangagiri, the journey heads toward Udumalaipettai through the Udumalpet - Dharapuram Road and By Pass Road. The journey primarily covers state highways and inter-district roads, with a focus on transitioning transporters via smooth expanses between these key locations.

Weather Conditions and Hazards

Typical weather conditions along this route include:

- **Summer (March to June):** High temperatures often exceeding 35°C, which can lead to heat stress for drivers and potential overheating of vehicles.
- Monsoons (July to September): Heavy rainfalls can cause flooding or waterlogging, especially in low-lying areas, impacting road conditions.
- Winter (November to February): Mild temperatures averaging 20-25°C, with minimal weather-related hazards.

Traffic Patterns and Congestion

- Peak Hours: Mornings (8-10 AM) and evenings (5-8 PM) typically showcase higher traffic volumes.
- Congestion Areas: Major towns en route, such as Dharapuram, may experience slowdowns due to market areas and local traffic.

Road Quality and Infrastructure

- **General Condition:** Varies from well-maintained state highways to narrower district roads, which may have potholes or uneven surfaces.
- Infrastructure Issues: Some sections may lack adequate signage or lighting, particularly on rural stretches.

Alternative Routes for Emergencies

• **Via Tiruppur:** If the primary route is blocked or under maintenance, rerouting through Tiruppur offers an alternative path, though it adds approximately 30 kilometers to the journey.

Local Regulations on Hazardous Materials

- Speed Limits: Must adhere to 40-60 km/h for heavy vehicles on highways.
- **Permits:** Proper documentation and permits for transporting hazardous materials are mandatory.
- **Timing Restrictions:** Transport of hazardous materials is often restricted during peak commuting hours.

Historical Incidents

- Accident Records: Occasional incidents involving heavy vehicles, primarily due to road width limitations and lack of visibility in foggy conditions.
- **Response Improvements:** Increased patrols and rescue operations have gradually reduced incident rates.

Environmental and Sensitive Areas

- Protected Areas: Passes through agricultural zones, which require adherence to emission norms to prevent crop impact.
- Noise and Emission Norms: Advised to minimize honking and adhere to exhaust emission standards.

Communication Coverage and Dead Zones

- **Coverage:** Good majority network coverage with occasional dead zones in remote areas, particularly between towns.
- Remedy: Ensure availability of satellite phones or CB radios for uninterrupted communication.

Emergency Response Times

- Urban Centers: Faster response times, averaging about 20-30 minutes.
- Rural Stretches: Response may take up to an hour due to accessibility challenges.

Overall Risk Assessment Summary

The route presents moderate risks due to weather conditions, road quality, and traffic congestion. However, proper planning, adherence to regulations, updated vehicle maintenance, and preemptive communication measures can mitigate these risks significantly. Regular training for drivers about local conditions and emergency protocols will further enhance safety and operational efficiency.
