

JOURNEY RISK MANAGEMENT (JRM) STUDY

Salem Terminal To SRI ANNAMAR ENTERPRIZES

Objective of the JRM Report

This JRM report is designed to ensure compliance with the Central Motor Vehicle Rules, 1989 (CMVR), AIS 140 standards, and the Road Transport Safety Policy (RTSP). It provides a comprehensive risk assessment for the transportation of hazardous materials along specified routes. By integrating these legal frameworks, the report offers a broad strategy for identifying and mitigating route-specific risks.

Regulatory Compliance

The report complies with the Central Motor Vehicles (Eleventh Amendment) Rules, 2022, mandating safe transportation practices for N2 and N3 category vehicles carrying hazardous materials. These rules require detailed route assessments, especially regarding road conditions, speed limits, and risk areas, to ensure safety compliance.

Risk Management Strategy

This report categorizes transportation routes into high-risk and medium-risk areas, with a focus on factors such as sharp turns, accident-prone regions, and elevation changes. The goal is to provide actionable recommendations to minimize these risks, including speed regulations, driver warnings for hazardous zones, and the option of alternate routes.

Compliance with the Road Transport Safety Policy (RTSP)

The report integrates RTSP provisions, including mandatory driving hours, rest periods, and nighttime driving restrictions. It ensures that drivers follow official guidelines, such as taking prescribed rest breaks and avoiding dangerous road conditions like poor visibility, heavy crowds, or high-traffic areas during peak hours.

Emergency Preparedness and Response

The report highlights the significance of predetermined emergency stops for refueling, rest, and overnight stays. It includes protocols for safe responses to road hazards, alternative routes, and rerouting processes if roads are closed or severe weather arises. This aligns with the RTSP emphasis on driver safety and rapid emergency response.

Environmental Considerations

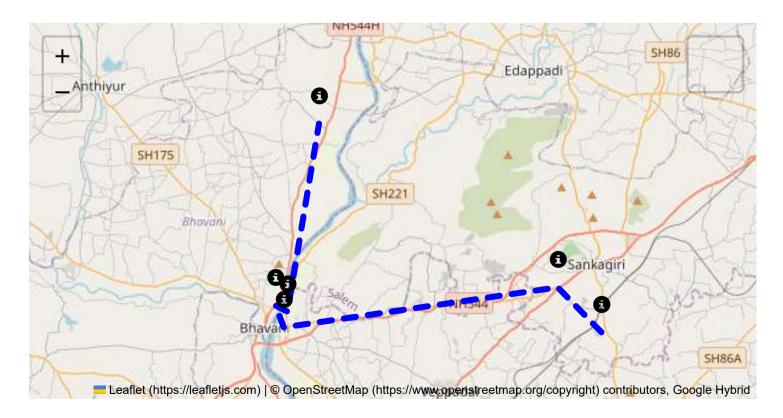

The JRM report addresses environmental risks along the route, ensuring compliance with environmental protection laws in ecologically sensitive zones. It suggests strategies such as identifying areas near water bodies, forests, or populated regions and implementing safety measures to minimize environmental impacts during transport.

Journey Risk Mitigation

The report includes route-specific risk assessments, detailed journey charts, and defensive driving guidelines for each transport route. Integration with vehicle tracking systems guarantees real-time warnings on hazardous areas, speed limits, and mandatory stops, consistent with RTSP and CMVR safety norms.

Compliance with Government Directives

This report fully adheres to governmental directives regarding hazardous material transportation, implementing mandatory speed limits, nighttime driving restrictions, and comprehensive driver briefings and real-time alerts about route-related risks.

Route Summary:

Total Distance: 37.94 km

Estimated Duration: 0.9 hours

Adjusted Duration (Heavy Vehicle): 1.2 hours

Start: (11.4381, 77.8734) End: (11.5538, 77.713143)

Welcome to the Journey Risk Management Study

1. Overview of the Route Map

The route from Sangagiri to Chittar via Sankari West, Komarapalayam, and Bhavani travels through a combination of rural and semi-urban areas in Tamil Nadu. It mainly uses regional roads, integrating local streets and highways. This route passes through varying landscapes, including agricultural lands and small towns.

2. Typical Weather Conditions and Potential Weather-Related Hazards

Tamil Nadu typically experiences a tropical climate. The region sees high temperatures, especially from March to June, and receives substantial rainfall during the monsoon months (October to December). Potential hazards include:

- Reduced visibility and slippery roads during monsoon rains.
- Heat-induced stress on vehicles and drivers during summer.
- Occasional instances of flooding in low-lying areas during heavy rains.

3. Analysis of Traffic Patterns

- **Peak Hours:** Traffic density increases during mornings (7-9 AM) and evenings (5-8 PM) due to local commute activities.
- Congestion-Prone Areas: Town centers in Sangagiri, Sankari West, Komarapalayam, and Bhavani might experience congestion, particularly near markets and schools.

4. Assessment of Road Quality and Infrastructure

- Most roads are generally well-maintained, but some stretches may be narrow and less smooth, especially in rural areas.
- Key infrastructures include bridges at Bhavani, which are crucial for route continuity.

5. Suggestions for Alternative Routes

In an emergency, consider diversions through nearby town roads or national highways, such as using NH544 for quicker transit or to avoid local congestion. Detailed local maps should be consulted for alternative routes.

6. Summary of Local Regulations Affecting Hazardous Material Transport

Transport of hazardous materials is strictly regulated. Ensure compliance with vehicle permits, load specifications, and timings allowed for hazardous material transport. Movement is often restricted during day hours to avoid risks in populated areas.

7. Overview of Historical Incidents

There have been occasional incidents of vehicular accidents, mainly due to driver error and road conditions. Historical data does not show significant accidents involving hazardous materials specifically along this route.

8. Environmental Considerations and Sensitive Areas

- Proximity to agricultural areas requires strict adherence to environmental protocols to prevent contamination.
- Be cautious near water bodies, specifically when crossing bridges.

9. Analysis of Communication Coverage

Communication networks are generally robust but expect potential coverage issues in rural segments between towns. Equip vehicles with emergency communication devices that can function even in areas of limited cellular coverage.

10. Estimated Emergency Response Times

- Sangagiri to Sankari West: Approximately 15-20 minutes.
- Sankari West to Komarapalayam: 25-30 minutes.
- Komarapalayam to Bhavani: 30-35 minutes, influenced by the bridge connectivity.

• **Bhavani to Chittar:** 15-20 minutes. Local emergency services are generally prompt, but rural stretches may experience delays.

11. An Overall Summary of Risk Assessment

This route involves moderate risk, primarily due to potential congestion in towns and weather-related issues. Road infrastructure is mostly reliable, though weather and peak traffic periods pose risks. Proper adherence to local transport laws for hazardous materials is critical. Employing alternative routes during emergencies and ensuring robust communication measures are in place will enhance safety for heavy vehicles transporting hazardous materials.

Risk Assessment - Turns

| | Risk Type | Risk Level | Coordinates | Speed Limit |
|----|------------|------------|--------------------|-------------|
| 0 | Turn | High | 11.43811, 77.87348 | 15 KM/Hr |
| 1 | Turn | Medium | 11.43961, 77.87341 | 30 KM/Hr |
| 2 | Turn | Medium | 11.43968, 77.87345 | 30 KM/Hr |
| 3 | Turn | High | 11.44029, 77.87544 | 15 KM/Hr |
| 4 | Turn | High | 11.45350, 77.85700 | 15 KM/Hr |
| 5 | Turn | Medium | 11.46303, 77.84945 | 30 KM/Hr |
| 6 | Turn | Medium | 11.46318, 77.84913 | 30 KM/Hr |
| 7 | Turn | High | 11.45518, 77.81344 | 15 KM/Hr |
| 8 | Turn | High | 11.45521, 77.81343 | 15 KM/Hr |
| 9 | Turn | High | 11.44377, 77.71562 | 15 KM/Hr |
| 10 | Turn | Medium | 11.44435, 77.71509 | 30 KM/Hr |
| 11 | Blind Spot | Blind Spot | 11.44105, 77.69331 | 10 KM/Hr |
| 12 | Turn | High | 11.44985, 77.69520 | 15 KM/Hr |
