JOURNEY RISK MANAGEMENT (JRM) STUDY

Salem Terminal TO M NARAYANASAMY NAIDU & SONS

Objective of the JRM Report

This JRM report is designed to ensure compliance with the Central Motor Vehicle Rules, 1989 (CMVR), AIS 140 standards, and the Road Transport Safety Policy (RTSP). It provides a comprehensive risk assessment for the transportation of hazardous materials along specified routes. By integrating these legal frameworks, the report offers a broad strategy for identifying and mitigating route-specific risks.

Regulatory Compliance

The report complies with the Central Motor Vehicles (Eleventh Amendment) Rules, 2022, mandating safe transportation practices for N2 and N3 category vehicles carrying hazardous materials. These rules require detailed route assessments, especially regarding road conditions, speed limits, and risk areas, to ensure safety compliance.

Risk Management Strategy

This report categorizes transportation routes into high-risk and medium-risk areas, with a focus on factors such as sharp turns, accident-prone regions, and elevation changes. The goal is to provide actionable

recommendations to minimize these risks, including speed regulations, driver warnings for hazardous zones, and the option of alternate routes.

Compliance with the Road Transport Safety Policy (RTSP)

The report integrates RTSP provisions, including mandatory driving hours, rest periods, and nighttime driving restrictions. It ensures that drivers follow official guidelines, such as taking prescribed rest breaks and avoiding dangerous road conditions like poor visibility, heavy crowds, or high-traffic areas during peak hours.

Emergency Preparedness and Response

The report highlights the significance of predetermined emergency stops for refueling, rest, and overnight stays. It includes protocols for safe responses to road hazards, alternative routes, and rerouting processes if roads are closed or severe weather arises. This aligns with the RTSP emphasis on driver safety and rapid emergency response.

Environmental Considerations

The JRM report addresses environmental risks along the route, ensuring compliance with environmental protection laws in ecologically sensitive zones. It suggests strategies such as identifying areas near water bodies, forests, or populated regions and implementing safety measures to minimize environmental impacts during transport.

Journey Risk Mitigation

The report includes route-specific risk assessments, detailed journey charts, and defensive driving guidelines for each transport route. Integration with vehicle tracking systems guarantees real-time warnings on hazardous areas, speed limits, and mandatory stops, consistent with RTSP and CMVR safety norms.

Compliance with Government Directives

This report fully adheres to governmental directives regarding hazardous material transportation, implementing mandatory speed limits, nighttime driving restrictions, and comprehensive driver briefings and real-time alerts about route-related risks.

Route Summary:
Total Distance: 87.19 km
Estimated Duration: 2.4 hours
Adjusted Duration (Heavy Vehicle): 3.0 hours
Start: (11.4381, 77.8734)
End: (12.0228, 77.8077)

Welcome to the Journey Risk Management Study

1. Overview of the Route Map

The route from Sangagiri, Tamil Nadu to Pattakarankottai, Tamil Nadu covers approximately 87.19 kilometers. The path leads through rural areas, with segments passing through smaller towns and villages. The primary roads involved are state highways and rural roads, which may vary in width and maintenance quality.

2. Typical Weather Conditions and Potential Weather-Related Hazards

Tamil Nadu experiences a tropical climate. The area may face heavy rainfall during the monsoon season (June to September), potentially causing flooding or landslides. During the summer (March to May), heatwaves might affect vehicle performance. Fog can be an issue in the early mornings, especially in the winter months (November to February), impacting visibility.

3. Analysis of Traffic Patterns

Peak traffic hours typically align with local commuting and school hours: 8-10 AM and 5-7 PM. Routes near towns such as Salem may exhibit higher congestion during these times. Sundays and festival days might see fluctuating traffic due to local events or markets.

4. Assessment of Road Quality and Infrastructure

The infrastructure quality varies significantly:

- **Highways:** Generally, in good condition, though shoulder width may be limited.
- **Rural Roads:** May have potholes, uneven surfaces, and limited signage. Watch for sharp turns and narrow bridges.

5. Suggestions for Alternative Routes for Emergencies

In the event of a blockage, consider taking state highways through Erode, although this will increase the distance. Local traffic updates can provide real-time alternatives considering road closures or construction work.

6. Summary of Local Regulations Affecting Hazardous Material Transport

Transport of hazardous materials in Tamil Nadu requires permits, strict adherence to safety standards, and notifications to local authorities. Night driving with such cargo is generally discouraged without prior clearance.

7. Overview of Historical Incidents

While specific historical data is limited, areas near Salem have reported incidents related to heavy vehicles, usually attributed to brake failures on inclines and driver fatigue. Regular rest stops and vehicle checks are advised.

8. Environmental Considerations and Sensitive Areas

The route passes through agricultural zones. Spillage or accidents could affect crop production and water sources, making immediate containment crucial. Avoid using horns near schools and residential areas.

9. Analysis of Communication Coverage

While major towns offer good mobile network coverage, rural stretches might experience dead zones. Ensure that GPS systems and radios are functional at all times.

10. Estimated Emergency Response Times

Emergency response times may differ:

- In cities such as Salem, response can be within 30-45 minutes.
- Rural areas can expect delays up to 1-2 hours due to distance and road quality. It's essential to have a clear emergency contact list and pre-established evacuation procedures.

11. Overall Summary of Risk Assessment

This route presents moderate risks typical of rural Indian roads:

- **Weather Effects:** Rain and fog may hinder travel.
- **Traffic Issues:** Congestion during peak hours near towns.
- **Road Quality:** Variability in maintenance and signage.
- **Emergency Response:** Limited in rural areas, necessitating preparedness. Proactive planning, with an emphasis on vehicle maintenance and real-time monitoring, can mitigate these risks. Regular communication with local authorities and adherence to transport regulations are critical for a safe journey.

Risk Assessment - Turns

	Risk Type	Risk Level	Coordinates	Speed Limit
0	Roundabout	High	11.58300, 77.85813	15 KM/Hr
