JOURNEY RISK MANAGEMENT (JRM) STUDY

Salem Terminal to NATIONAL SERVICE STATIONHOSUR

Objective of the JRM Report

This JRM report is designed to ensure compliance with the Central Motor Vehicle Rules, 1989 (CMVR), AIS 140 standards, and the Road Transport Safety Policy (RTSP). It provides a comprehensive risk assessment for the transportation of hazardous materials along specified routes. By integrating these legal frameworks, the report offers a broad strategy for identifying and mitigating route-specific risks.

Regulatory Compliance

The report complies with the Central Motor Vehicles (Eleventh Amendment) Rules, 2022, mandating safe transportation practices for N2 and N3 category vehicles carrying hazardous materials. These rules require detailed route assessments, especially regarding road conditions, speed limits, and risk areas, to ensure safety compliance.

Risk Management Strategy

This report categorizes transportation routes into high-risk and medium-risk areas, with a focus on factors such as sharp turns, accident-prone regions, and elevation changes. The goal is to provide actionable recommendations to minimize these risks, including speed regulations, driver warnings for hazardous zones, and the option of alternate routes.

Compliance with the Road Transport Safety Policy (RTSP)

The report integrates RTSP provisions, including mandatory driving hours, rest periods, and nighttime driving restrictions. It ensures that drivers follow official guidelines, such as taking prescribed rest breaks and avoiding dangerous road conditions like poor visibility, heavy crowds, or high-traffic areas during peak hours.

Emergency Preparedness and Response

The report highlights the significance of predetermined emergency stops for refueling, rest, and overnight stays. It includes protocols for safe responses to road hazards, alternative routes, and rerouting processes if roads are closed or severe weather arises. This aligns with the RTSP emphasis on driver safety and rapid emergency response.

Environmental Considerations

The JRM report addresses environmental risks along the route, ensuring compliance with environmental protection laws in ecologically sensitive zones. It suggests strategies such as identifying areas near water bodies, forests, or populated regions and implementing safety measures to minimize environmental impacts during transport.

Journey Risk Mitigation

The report includes route-specific risk assessments, detailed journey charts, and defensive driving guidelines for each transport route. Integration with vehicle tracking systems guarantees real-time warnings on hazardous areas, speed limits, and mandatory stops, consistent with RTSP and CMVR safety norms.

Compliance with Government Directives

This report fully adheres to governmental directives regarding hazardous material transportation, implementing mandatory speed limits, nighttime driving restrictions, and comprehensive driver briefings and real-time alerts about route-related risks.

Route Summary:
Total Distance: 195.24 km
Estimated Duration: 3.7 hours

Adjusted Duration (Heavy Vehicle): 4.7 hours

Start: (11.4381, 77.8734)

End: (12.748159, 77.807951)

Welcome to the Journey Risk Management Study

1. Overview of the Route Map

The route from Sangagiri to Hosur via Salem, Omalur, and Krishnagiri covers approximately 195.24 kilometers. The journey typically takes around 3.74 hours for heavy vehicles carrying hazardous materials. The route primarily consists of national and state highways, providing a direct connection through Tamil Nadu, ultimately leading to the Bangalore main road in Hosur.

2. Typical Weather Conditions and Potential Weather-Related Hazards

Tamil Nadu generally experiences a tropical climate, with hot summers, moderate monsoons, and mild winters:

- **Summer (March to June):** High temperatures, posing a risk of tire blowouts and engine overheating.
- **Monsoon (July to September):** Moderate to heavy rainfall, increasing the risk of waterlogging, reduced visibility, and slippery roads.
- **Winter (October to February):** Generally mild, but early morning fog could occasionally reduce visibility.

Weather-related hazards to watch for include waterlogged roads during monsoon and reduced traction during both monsoon and foggy conditions.

3. Analysis of Traffic Patterns

- **Salem and Krishnagiri:** Known for high traffic, especially during office hours in the morning (8-10 AM) and evening (5-7 PM).
- **Toll Plazas:** Increased congestion during weekends and holidays.

- **Peak Congestion Areas:** Near urban centers like Salem and the toll bypass in Krishnagiri.

4. Assessment of Road Quality and Infrastructure

- **Highways:** Generally well-maintained (NH 44 and NH 79 are major parts of this route).
- **Potential Issues:** Some sections might have ongoing construction or maintenance work leading to temporary diversions.
- **Infrastructure:** Numerous fueling stations and rest stops are available, but quality may vary.

5. Suggestions for Alternative Routes for Emergencies

In case of road closures or major disruptions:

- **Alternative Route via Mettur Dam:** Use SH 20 through Mettur if NH 44 is heavily congested.

6. Summary of Local Regulations Affecting Hazardous Material Transport

- **Permits Required:** Transportation of hazardous materials requires specific permits and compliance with safety regulations.
- **Time Restrictions:** Night driving restrictions may apply to vehicles carrying hazardous materials in certain urban areas.

7. Overview of Historical Incidents

- **Recent Incidents:** Accidents involving heavy vehicles have occurred, particularly near Krishnagiri, often due to speeding or loss of control.
- **Hazardous Materials:** Historical data on hazardous material transport incidents is limited but caution is advised due to potential safety hazards.

8. Environmental Considerations

- **Sensitive Areas:** Ensure caution near water bodies and agricultural zones to prevent contamination.
- **Garbage Disposal:** Proper disposal protocols should be followed due to legal and environmental ramifications.

9. Analysis of Communication Coverage

Mobile network coverage along major highways is generally strong, but dead zones may occur in:

- Rural stretches between Salem and Omalur.
- Outside urban areas near Krishnagiri.

10. Estimated Emergency Response Times

- **Near Urban Centers (Salem, Hosur):** 15-30 minutes.
- **Rural Areas:** 45-60 minutes or longer, depending on the accessibility of the route.

11. Overall Summary of Risk Assessment

This route is generally well-traveled and infrastructure is good, but risks include:

- **Weather Conditions:** Mainly during monsoon and foggy periods.
- **Traffic Congestion:** Particularly around major urban centers and toll plazas.
- **Environmental and Safety Regulations:** Adherence to local regulations and safety measures is critical.

Proper planning, adherence to speed limits, and communication with local traffic authorities are recommended for a safe journey. Additionally, keeping emergency contacts readily available and conducting pre-journey checks can mitigate potential risks.

Risk Assessment - Turns

	Risk Type	Risk Level	Coordinates	Speed Limit
0	Turn	High	11.43968, 77.87345	15 KM/Hr
