JOURNEY RISK MANAGEMENT (JRM) STUDY

Salem Terminal TO GAYATHRI FUELS

Objective of the JRM Report

This JRM report is designed to ensure compliance with the Central Motor Vehicle Rules, 1989 (CMVR), AIS 140 standards, and the Road Transport Safety Policy (RTSP). It provides a comprehensive risk assessment for the transportation of hazardous materials along specified routes. By integrating these legal frameworks, the report offers a broad strategy for identifying and mitigating route-specific risks.

Regulatory Compliance

The report complies with the Central Motor Vehicles (Eleventh Amendment) Rules, 2022, mandating safe transportation practices for N2 and N3 category vehicles carrying hazardous materials. These rules require detailed route assessments, especially regarding road conditions, speed limits, and risk areas, to ensure safety compliance.

Risk Management Strategy

This report categorizes transportation routes into high-risk and medium-risk areas, with a focus on factors such as sharp turns, accident-prone regions, and elevation changes. The goal is to provide actionable

recommendations to minimize these risks, including speed regulations, driver warnings for hazardous zones, and the option of alternate routes.

Compliance with the Road Transport Safety Policy (RTSP)

The report integrates RTSP provisions, including mandatory driving hours, rest periods, and nighttime driving restrictions. It ensures that drivers follow official guidelines, such as taking prescribed rest breaks and avoiding dangerous road conditions like poor visibility, heavy crowds, or high-traffic areas during peak hours.

Emergency Preparedness and Response

The report highlights the significance of predetermined emergency stops for refueling, rest, and overnight stays. It includes protocols for safe responses to road hazards, alternative routes, and rerouting processes if roads are closed or severe weather arises. This aligns with the RTSP emphasis on driver safety and rapid emergency response.

Environmental Considerations

The JRM report addresses environmental risks along the route, ensuring compliance with environmental protection laws in ecologically sensitive zones. It suggests strategies such as identifying areas near water bodies, forests, or populated regions and implementing safety measures to minimize environmental impacts during transport.

Journey Risk Mitigation

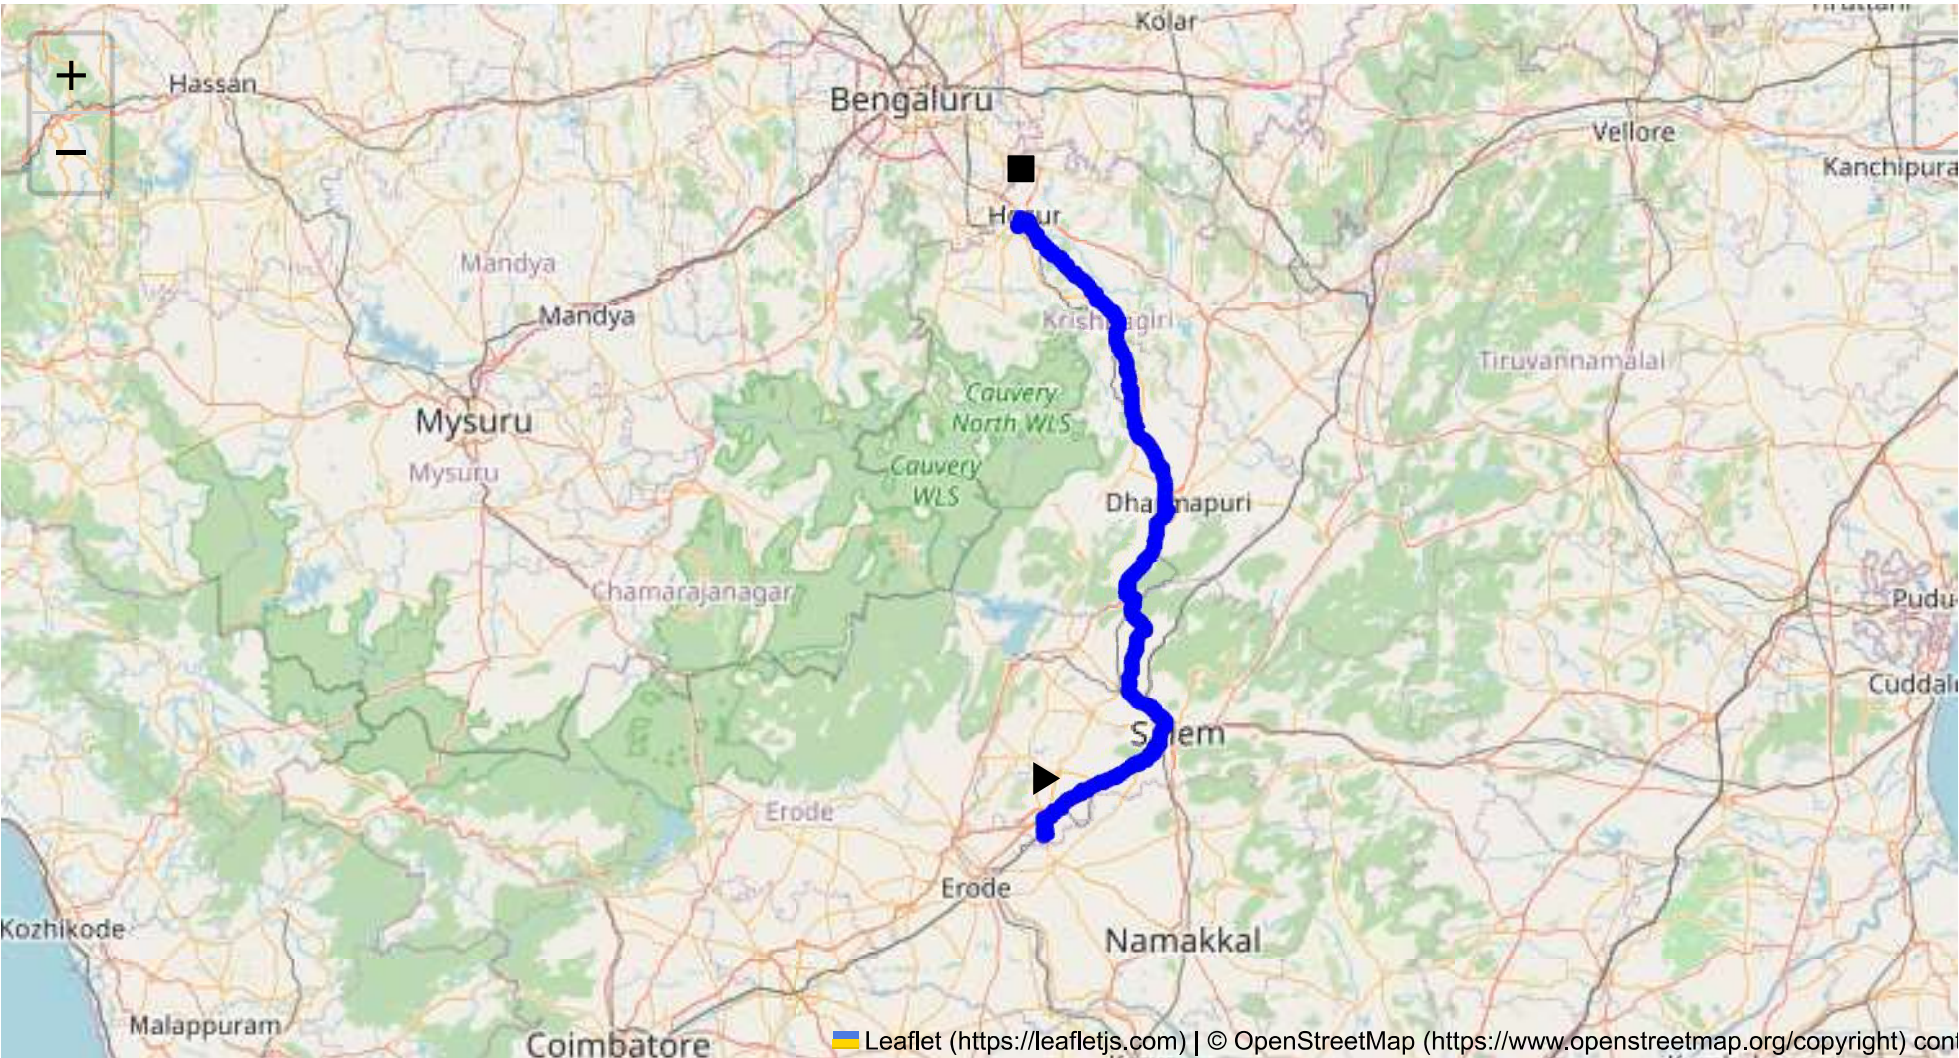

The report includes route-specific risk assessments, detailed journey charts, and defensive driving guidelines for each transport route. Integration with vehicle tracking systems guarantees real-time warnings on hazardous areas, speed limits, and mandatory stops, consistent with RTSP and CMVR safety norms.

Compliance with Government Directives

This report fully adheres to governmental directives regarding hazardous material transportation, implementing mandatory speed limits, nighttime driving restrictions, and comprehensive driver briefings and real-time alerts about route-related risks.

Route Summary:
Total Distance: 185.79 km
Estimated Duration: 3.6 hours
Adjusted Duration (Heavy Vehicle): 4.5 hours
Start: (11.4381, 77.8734)
End: (12.708649, 77.81688)

Welcome to the Journey Risk Management Study

To analyze the route from Sangagiri to Barath Nagar, here's a comprehensive review considering potential hazards for a truck driver carrying hazardous materials:

- Overview of the Route Map:** The route from Sangagiri to Barath Nagar spans approximately 185.79 kilometers. It typically includes major highways like NH44 and smaller state roads. The journey traverses different terrains, varying from urban to rural areas.

2. **Typical Weather Conditions and Weather-related Hazards:** Tamil Nadu generally experiences hot and dry conditions, especially from March to June. Monsoon is from October to December, potentially leading to heavy rainfall and flooding. Drivers should be cautious during these months as roads may become slippery, and visibility could be reduced.
3. **Traffic Patterns and Congestion:** Traffic congestion in the morning (7 AM to 10 AM) and evening (5 PM to 8 PM) is common, especially near urban centers like Salem and Krishnagiri. NH44 is particularly prone to heavy traffic. Planning around these times can reduce delays.
4. **Assessment of Road Quality and Infrastructure:** Major highways like NH44 are typically well-maintained. Be cautious of potholes and roadwork on smaller state roads, especially in rural areas. Regular updates on road conditions should be monitored as repairs or expansions could affect travel times.
5. **Alternative Routes for Emergencies:** In emergencies, routes via smaller highways such as SH18 could serve as alternatives, although they might increase travel time. Knowing these routes in advance can be critical for timely diversions.
6. **Local Regulations on Hazardous Material Transport:** Tamil Nadu requires permits for transporting hazardous materials, following the Motor Vehicles Act and related environmental laws. Drivers should ensure proper documentation and adherence to speed limits and designated transportation timings for such materials.
7. **Historical Incidents Involving Heavy Vehicles:** There have been incidents of overturned vehicles and fire hazards, especially on busy roads like NH44. Adhering to safety measures, routine inspection, and proper load management is essential.
8. **Environmental Considerations and Sensitive Areas:** The route passes near sensitive ecological zones, especially near forest areas. Drivers should avoid stopping or parking in these regions and adhere to speed regulations to prevent wildlife accidents.
9. **Communication Coverage:** While most parts of the route have good network coverage, certain rural or forested sections may experience dead zones. A reliable GPS device and communication tools are advised.
10. **Estimated Emergency Response Times:** Response times vary; urban areas like Salem and Krishnagiri typically see quick responses (under 30 minutes), while rural and remote areas could take up to 1-2 hours. Knowing emergency contact points along the route is crucial.
11. **Overall Summary of Risk Assessment:** The route from Sangagiri to Barath Nagar primarily involves traveling on major highways, posing typical urban traffic risks. Monsoonal weather, traffic congestion, and potential infrastructure deficits on state roads are key concerns. A structured pre-trip inspection, monitoring of weather and road conditions, adherence to regulations, and awareness of alternative routes are essential for safe transport.

By following these guidelines and remaining vigilant, drivers can minimize risks involved in transporting hazardous materials on this route.
