JOURNEY RISK MANAGEMENT (JRM) STUDY

Salem Terminal to K.N.S. AGENCY

Objective of the JRM Report

This JRM report is designed to ensure compliance with the Central Motor Vehicle Rules, 1989 (CMVR), AIS 140 standards, and the Road Transport Safety Policy (RTSP). It provides a comprehensive risk assessment for the transportation of hazardous materials along specified routes. By integrating these legal frameworks, the report offers a broad strategy for identifying and mitigating route-specific risks.

Regulatory Compliance

The report complies with the Central Motor Vehicles (Eleventh Amendment) Rules, 2022, mandating safe transportation practices for N2 and N3 category vehicles carrying hazardous materials. These rules require detailed route assessments, especially regarding road conditions, speed limits, and risk areas, to ensure safety compliance.

Risk Management Strategy

This report categorizes transportation routes into high-risk and medium-risk areas, with a focus on factors such as sharp turns, accident-prone regions, and elevation changes. The goal is to provide actionable recommendations to minimize these risks, including speed regulations, driver warnings for hazardous zones, and the option of alternate routes.

Compliance with the Road Transport Safety Policy (RTSP)

The report integrates RTSP provisions, including mandatory driving hours, rest periods, and nighttime driving restrictions. It ensures that drivers follow official guidelines, such as taking prescribed rest breaks and avoiding dangerous road conditions like poor visibility, heavy crowds, or high-traffic areas during peak hours.

Emergency Preparedness and Response

The report highlights the significance of predetermined emergency stops for refueling, rest, and overnight stays. It includes protocols for safe responses to road hazards, alternative routes, and rerouting processes if roads are closed or severe weather arises. This aligns with the RTSP emphasis on driver safety and rapid emergency response.

Environmental Considerations

The JRM report addresses environmental risks along the route, ensuring compliance with environmental protection laws in ecologically sensitive zones. It suggests strategies such as identifying areas near water bodies, forests, or populated regions and implementing safety measures to minimize environmental impacts during transport.

Journey Risk Mitigation

The report includes route-specific risk assessments, detailed journey charts, and defensive driving guidelines for each transport route. Integration with vehicle tracking systems guarantees real-time warnings on hazardous areas, speed limits, and mandatory stops, consistent with RTSP and CMVR safety norms.

Compliance with Government Directives

This report fully adheres to governmental directives regarding hazardous material transportation, implementing mandatory speed limits, nighttime driving restrictions, and comprehensive driver briefings and real-time alerts about route-related risks.

Route Summary:
Total Distance: 151.38 km
Estimated Duration: 3.0 hours
Adjusted Duration (Heavy Vehicle): 3.7 hours

Start: (11.4381, 77.8734)
End: (12.522651, 78.219139)

Welcome to the Journey Risk Management Study

1. Overview of the Route Map

The route spans approximately 151.38 kilometers, originating from Sangagiri and ending at Krishnagiri, passing through several key points, including Bhavani Main Road, SH 86, and Salem. The path mainly traverses state highways and major roads that are frequented by heavy vehicles.

2. Typical Weather Conditions and Potential Weather-Related Hazards

Tamil Nadu experiences a tropical climate, with the following expected conditions:

- **Summer (March to June):** High temperatures, potential heating hazards affecting vehicle performance.
- **Monsoon (July to September):** Heavy rainfall can result in reduced visibility, slippery roads, and minor flooding in low-lying areas.
- **Post-Monsoon and Winter (October to February):** Generally mild conditions, but occasional fog may reduce visibility in early mornings.

3. Analysis of Traffic Patterns

- **Peak Hours:**
 - Morning: 8 AM to 10 AM
 - Evening: 5 PM to 8 PM
- **Congestion-Prone Areas:**
 - **Salem City:** High traffic due to urban density, particularly on main roads.
 - **Bhavani Main Road and SH 86:** Busy during agricultural seasons due to local market freight.

4. Assessment of Road Quality and Infrastructure

- **General Road Quality:** Most segments are well-maintained state highways; however, minor roads in and around Salem may experience wear and tear.
- **Infrastructure:** Adequate signage and road markings, occasional construction in expanding urban areas can cause temporary hazards.

5. Suggestions for Alternative Routes for Emergencies

- Utilize NH 44 to bypass Salem if congested.
- NH 544 serves as a viable alternate parallel route providing bypass options to Krishnagiri.

6. Summary of Local Regulations Affecting Hazardous Material Transport

- **Timings:** Restrictions may apply in specific urban areas during peak hours.
- **Mandatory Safety Measures:** Inspection compliance check, placards on vehicles, and specific permits required for transporting hazardous materials.

7. Overview of Historical Incidents

No significant historical incidents involving heavy vehicles or hazardous materials have been recorded on this route specifically, but adjacent areas have seen minor incidents due to slippery roads during monsoon season.

8. Environmental Considerations and Sensitive Areas

- **Sensitive Areas:**
 - Agricultural zones near Bhavani Main Road.
 - Waterways around Salem may require caution to prevent contamination.
- **Environmental Concerns:** Minimize emissions around populated areas, and ensure no spillage in agricultural lands.

9. Analysis of Communication Coverage

- **Coverage:** Generally reliable in urban and semi-urban sections.
- **Dead Zones:** Rural stretches, primarily between Salem and Kaveripattinam, may have weak signals intermittently.

10. Estimated Emergency Response Times

- **Urban Segments (Salem):** Approximately 15-20 minutes.
- **Rural Areas:** Up to 30-45 minutes due to sparse facilities and potential access issues.

12. Overall Summary of Risk Assessment

The route is largely safe for heavy vehicle transport with standard preparations for weather and traffic conditions. Significant care should be taken during peak traffic hours and adverse weather conditions. Alternative routes should be planned ahead of time to ensure smooth navigation in case of unforeseen

circumstances. Monitoring local regulations and ensuring compliance with safety standards are essential to minimize risks associated with hazardous material transport.
