JOURNEY RISK MANAGEMENT (JRM) STUDY

Salem Terminal to KAVIRAJ AGENCY

Objective of the JRM Report

This JRM report is designed to ensure compliance with the Central Motor Vehicle Rules, 1989 (CMVR), AIS 140 standards, and the Road Transport Safety Policy (RTSP). It provides a comprehensive risk assessment for the transportation of hazardous materials along specified routes. By integrating these legal frameworks, the report offers a broad strategy for identifying and mitigating route-specific risks.

Regulatory Compliance

The report complies with the Central Motor Vehicles (Eleventh Amendment) Rules, 2022, mandating safe transportation practices for N2 and N3 category vehicles carrying hazardous materials. These rules require detailed route assessments, especially regarding road conditions, speed limits, and risk areas, to ensure safety compliance.

Risk Management Strategy

This report categorizes transportation routes into high-risk and medium-risk areas, with a focus on factors such as sharp turns, accident-prone regions, and elevation changes. The goal is to provide actionable recommendations to minimize these risks, including speed regulations, driver warnings for hazardous zones, and the option of alternate routes.

Compliance with the Road Transport Safety Policy (RTSP)

The report integrates RTSP provisions, including mandatory driving hours, rest periods, and nighttime driving restrictions. It ensures that drivers follow official guidelines, such as taking prescribed rest breaks and avoiding dangerous road conditions like poor visibility, heavy crowds, or high-traffic areas during peak hours.

Emergency Preparedness and Response

The report highlights the significance of predetermined emergency stops for refueling, rest, and overnight stays. It includes protocols for safe responses to road hazards, alternative routes, and rerouting processes if roads are closed or severe weather arises. This aligns with the RTSP emphasis on driver safety and rapid emergency response.

Environmental Considerations

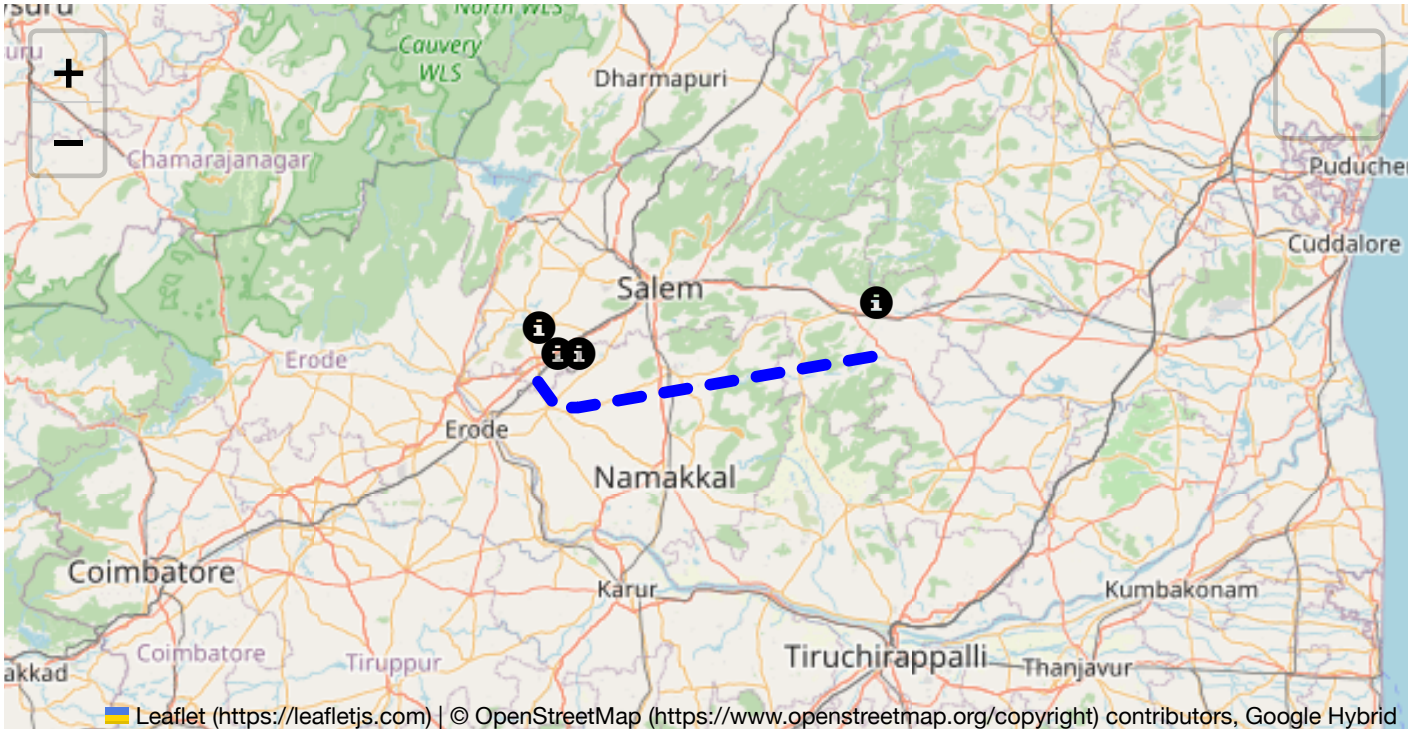

The JRM report addresses environmental risks along the route, ensuring compliance with environmental protection laws in ecologically sensitive zones. It suggests strategies such as identifying areas near water bodies, forests, or populated regions and implementing safety measures to minimize environmental impacts during transport.

Journey Risk Mitigation

The report includes route-specific risk assessments, detailed journey charts, and defensive driving guidelines for each transport route. Integration with vehicle tracking systems guarantees real-time warnings on hazardous areas, speed limits, and mandatory stops, consistent with RTSP and CMVR safety norms.

Compliance with Government Directives

This report fully adheres to governmental directives regarding hazardous material transportation, implementing mandatory speed limits, nighttime driving restrictions, and comprehensive driver briefings and real-time alerts about route-related risks.

Route Summary:
Total Distance: 107.93 km
Estimated Duration: 2.6 hours
Adjusted Duration (Heavy Vehicle): 3.2 hours

Start: (11.4381, 77.8734)
End: (11.49824, 78.66449)

Welcome to the Journey Risk Management Study

1. Overview of the Route Map

The route from CVQF+23W, Sangagiri, Tamil Nadu, to FMX7+9F2, Tamil Nadu, is approximately 107.93 kilometers. It includes major waypoints such as Namakkal and Kavundampalaiyam via State Highway 79 (SH 79). The route includes state highways and mostly rural roadways, passing through mixed-use areas comprising agricultural lands, small towns, and industrial zones.

2. Typical Weather Conditions and Hazards

Tamil Nadu experiences a tropical climate. The route may be affected by:

- **Monsoons (June to September):** Heavy rainfall can cause waterlogging and slippery roads.
- **Summer (March to May):** High temperatures can lead to road surface issues and tire blowouts.
- **Fog in Winter (December to February):** Reduced visibility, especially early in the morning.

3. Traffic Patterns

- **Peak Hours:** Morning (7 AM - 9 AM) and Evening (5 PM - 8 PM).
- **Congestion-Prone Areas:** Namakkal, being a busy junction, sees significant traffic. The SH 79 can be busy with commercial vehicles.

4. Assessment of Road Quality and Infrastructure

- **SH 79:** Generally well-maintained but watch out for occasional potholes and unmarked roadwork.
- **Rural Roads:** Can be narrow, with limited shoulder space.

5. Alternative Routes for Emergencies

- **Via NH948:** This offers an alternative if SH 79 is blocked. The national highway is generally wider and better maintained.
- **Local Roads Connectors:** Use local knowledge to skirt around specific incidents or roadblocks.

6. Local Regulations Affecting Hazardous Material Transport

- Permit requirements for hazardous goods.
- Restrictions during night travel.
- Limits on speed and designated rest areas for trucks.

7. Overview of Historical Incidents

- **Heavy vehicles:** Instances mostly involve overturning due to speed or road conditions, especially during rain.
- **Hazardous Materials:** Rare, with more focus needed on stringent checking and enforcement.

8. Environmental Considerations and Sensitive Areas

- Proximity to water bodies means potential spills can have severe consequences.
- Agricultural zones require care to prevent contamination of land and water.

9. Communication Coverage

- **Coverage:** Generally good along SH 79, but some rural stretches might have weak signals.
- **Dead Zones:** Identified in more isolated rural sections; advisable to have offline navigation tools.

10. Estimated Emergency Response Times

- **Urban Areas (e.g., Namakkal):** Approx. 15-30 minutes.
- **Rural Areas:** Response can be delayed up to an hour due to distance and road access issues.

11. Overall Summary of Risk Assessment

- **Low to Moderate Risk:** Good infrastructure on SH 79, but caution needed for weather conditions and rural segments.
- **Potential Hazards:** Weather-related, congestion at Namakkal, and poor road quality in parts.
- **Preparation:** Equip drivers with weather updates, proper training for handling emergencies, and backup communication devices.

This comprehensive analysis should help ensure safe transit for heavy vehicles transporting hazardous materials across these routes in Tamil Nadu.

Risk Assessment - Turns
