JOURNEY RISK MANAGEMENT (JRM) STUDY

Salem Terminal to PAARVATHI FUELS

Objective of the JRM Report

This JRM report is designed to ensure compliance with the Central Motor Vehicle Rules, 1989 (CMVR), AIS 140 standards, and the Road Transport Safety Policy (RTSP). It provides a comprehensive risk assessment for the transportation of hazardous materials along specified routes. By integrating these legal frameworks, the report offers a broad strategy for identifying and mitigating route-specific risks.

Regulatory Compliance

The report complies with the Central Motor Vehicles (Eleventh Amendment) Rules, 2022, mandating safe transportation practices for N2 and N3 category vehicles carrying hazardous materials. These rules require detailed route assessments, especially regarding road conditions, speed limits, and risk areas, to ensure safety compliance.

Risk Management Strategy

This report categorizes transportation routes into high-risk and medium-risk areas, with a focus on factors such as sharp turns, accident-prone regions, and elevation changes. The goal is to provide actionable

recommendations to minimize these risks, including speed regulations, driver warnings for hazardous zones, and the option of alternate routes.

Compliance with the Road Transport Safety Policy (RTSP)

The report integrates RTSP provisions, including mandatory driving hours, rest periods, and nighttime driving restrictions. It ensures that drivers follow official guidelines, such as taking prescribed rest breaks and avoiding dangerous road conditions like poor visibility, heavy crowds, or high-traffic areas during peak hours.

Emergency Preparedness and Response

The report highlights the significance of predetermined emergency stops for refueling, rest, and overnight stays. It includes protocols for safe responses to road hazards, alternative routes, and rerouting processes if roads are closed or severe weather arises. This aligns with the RTSP emphasis on driver safety and rapid emergency response.

Environmental Considerations

The JRM report addresses environmental risks along the route, ensuring compliance with environmental protection laws in ecologically sensitive zones. It suggests strategies such as identifying areas near water bodies, forests, or populated regions and implementing safety measures to minimize environmental impacts during transport.

Journey Risk Mitigation

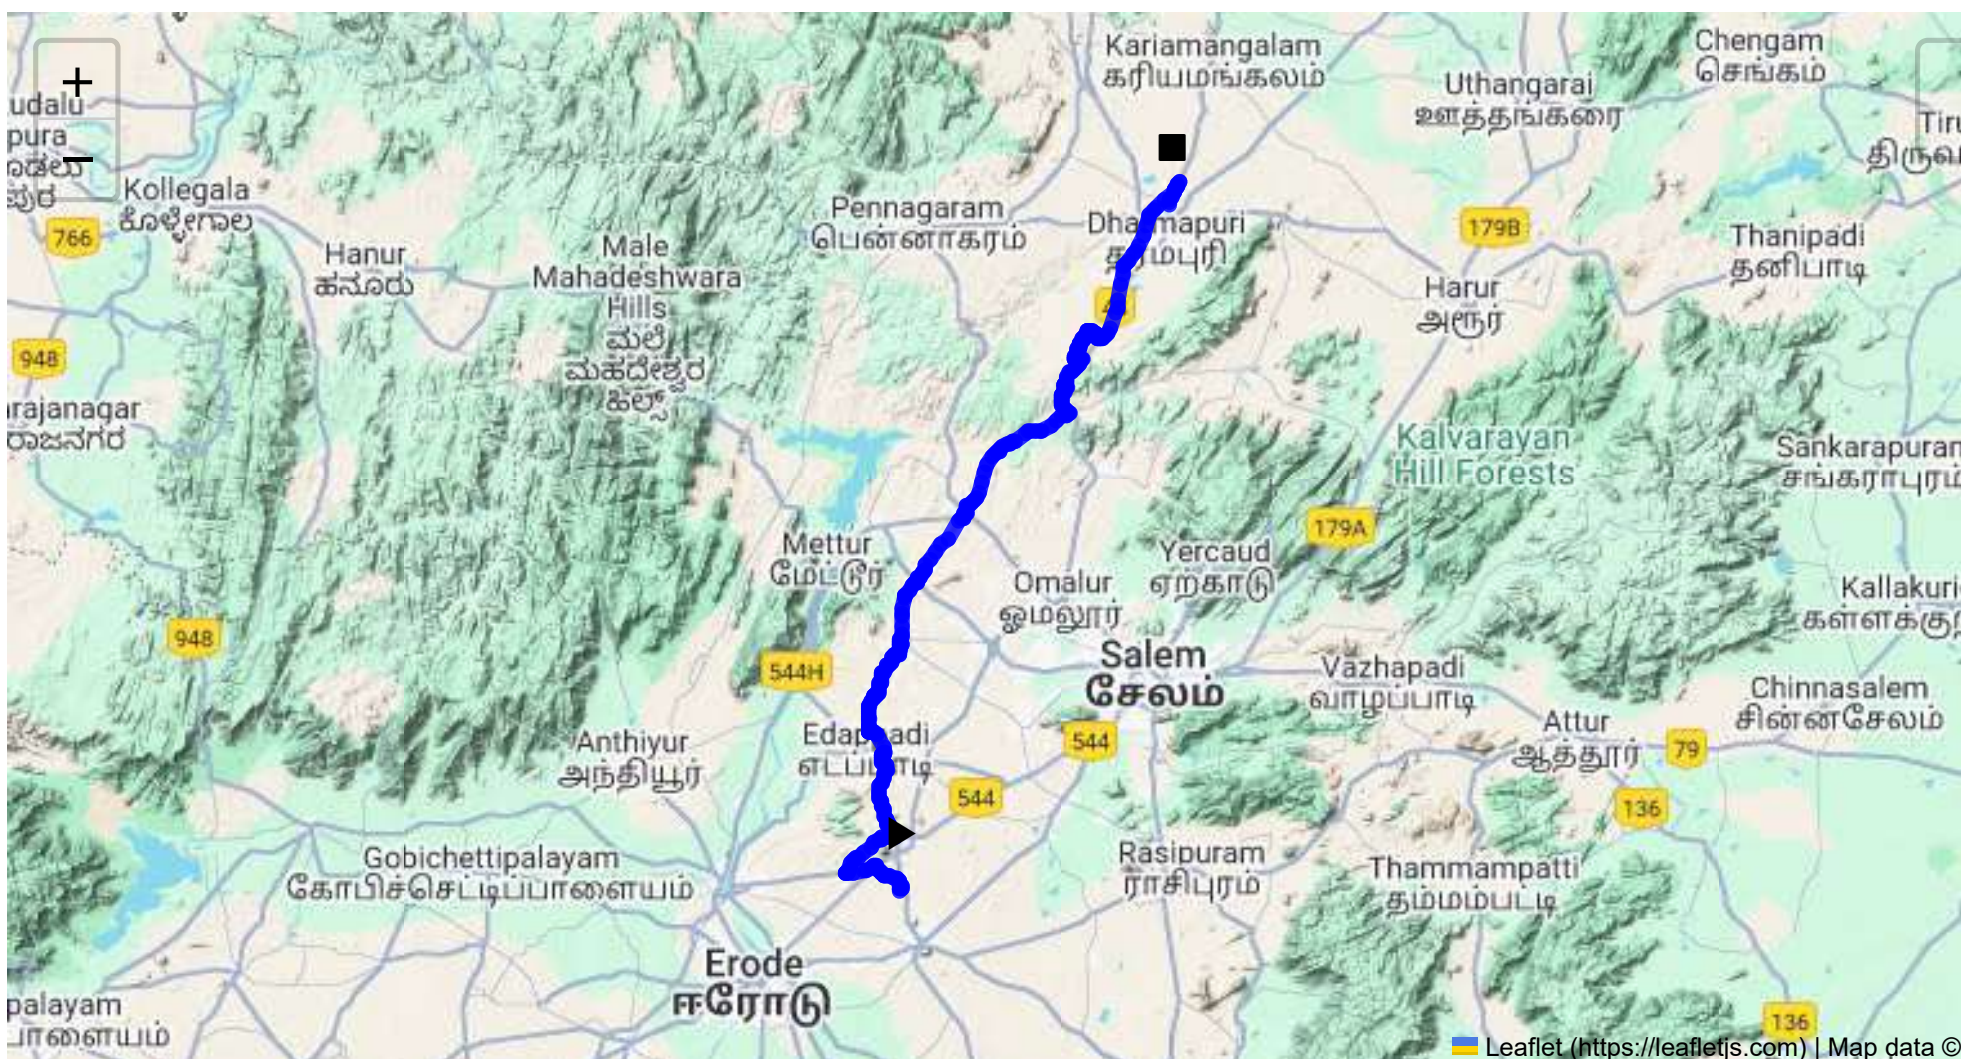

The report includes route-specific risk assessments, detailed journey charts, and defensive driving guidelines for each transport route. Integration with vehicle tracking systems guarantees real-time warnings on hazardous areas, speed limits, and mandatory stops, consistent with RTSP and CMVR safety norms.

Compliance with Government Directives

This report fully adheres to governmental directives regarding hazardous material transportation, implementing mandatory speed limits, nighttime driving restrictions, and comprehensive driver briefings and real-time alerts about route-related risks.

Route Summary:
Total Distance: 117.37 km
Estimated Duration: 2.7 hours
Adjusted Duration (Heavy Vehicle): 3.3 hours
Start: (11.4381, 77.8734)
End: (12.154, 78.163)

Welcome to the Journey Risk Management Study

1. Overview of the Route Map

The specified route is approximately 117.37 kilometers in length, connecting Sangagiri to A.Reddihalli in Tamil Nadu. The route passes through multiple towns and villages, including Sankari RS, Sankari West, Padaiveedu, Kurumbapatti, Avanurkottai, Vellakkal, Maniathahalli, Dokkubodanahalli, Nallampalli, and MGR Nagar. The path mostly follows main roads that are key for regional connectivity.

2. Typical Weather Conditions and Potential Weather-Related Hazards

The region of Tamil Nadu experiences a tropical climate. Key weather considerations include:

- **Summer (March to June):** High temperatures up to 40°C, which could impact vehicle performance.
- **Monsoon (July to September):** Heavy rain leading to potential flooding, especially on rural roads with insufficient drainage.
- **Winter (November to February):** Mild weather, with occasional fog in the mornings, which can affect visibility.

3. Traffic Patterns

- **Peak Hours:** Morning (8:00 AM - 10:00 AM) and evening (5:00 PM - 8:00 PM) tend to be busiest, especially near town centers like Sangagiri and Sankari.
- **Congestion-Prone Areas:** Sankari RS - Erode Privu Rd and Bhavani Main Road in Sankari West frequently experience slowdowns. Roadworks can exacerbate congestion.

4. Assessment of Road Quality and Infrastructure

- **Road Conditions:** Generally well-maintained, but some stretches, particularly in more rural areas, may have potholes or uneven surfaces.
- **Infrastructure:** Presence of multiple junctions and level crossings which require cautious driving. Most areas have basic signage, but additional caution is required at night.

5. Suggestions for Alternative Routes for Emergencies

Consider using the Sankari to Bhavani road or NH44 if there are emergencies leading to major obstructions or hazardous conditions along the main route.

6. Local Regulations Affecting Hazardous Material Transport

Tamil Nadu imposes strict guidelines for the transportation of hazardous materials, including:

- Vehicle-specific permits & licenses
- Mandatory safety equipment (e.g., fire extinguishers, spill kits)
- Restricted times for transit through urban areas

7. Overview of Historical Incidents

There have been incidents along this route involving heavy vehicles due to:

- Overturned vehicles from sharp turns
- Accidents at busy junctions, largely due to misjudgment or speeding
- Inclement weather contributing to loss of control

8. Environmental Considerations and Sensitive Areas

The route crosses agricultural areas and occasionally near water bodies. Care should be taken to prevent contamination from accidental spills.

9. Analysis of Communication Coverage

- Communication Zones:** Well-covered near major towns and cities.
- Potential Dead Zones:** Parts of the route near Avanurkottai and Maniathahalli have weaker signals, which could potentially impede emergency communication.

10. Estimated Emergency Response Times

- Urban Areas (e.g., Sangagiri, Sankari):** Approximately 20-30 minutes due to better access to emergency services.
- Rural Areas (e.g., Vellakkal, Maniathahalli):** Can be up to an hour or more, dependent on road conditions and time of day.

12. Overall Summary of Risk Assessment

Overall, the route from Sangagiri to A.Reddihalli is moderately safe for transporting hazardous materials, provided that regulations are followed, and due caution is observed, especially during adverse weather conditions and peak traffic times. Better communication infrastructure in rural segments and enhanced road conditions in certain sections would further minimize risks.

Risk Assessment - Turns

	Risk Type	Risk Level	Coordinates	Speed Limit
0	Roundabout	High	11.58300, 77.85813	15 KM/Hr
