JOURNEY RISK MANAGEMENT (JRM) STUDY

Salem Terminal to HARUR APCMS BOMMIDI

Objective of the JRM Report

This JRM report is designed to ensure compliance with the Central Motor Vehicle Rules, 1989 (CMVR), AIS 140 standards, and the Road Transport Safety Policy (RTSP). It provides a comprehensive risk assessment for the transportation of hazardous materials along specified routes. By integrating these legal frameworks, the report offers a broad strategy for identifying and mitigating route-specific risks.

Regulatory Compliance

The report complies with the Central Motor Vehicles (Eleventh Amendment) Rules, 2022, mandating safe transportation practices for N2 and N3 category vehicles carrying hazardous materials. These rules require detailed route assessments, especially regarding road conditions, speed limits, and risk areas, to ensure safety compliance.

Risk Management Strategy

This report categorizes transportation routes into high-risk and medium-risk areas, with a focus on factors such as sharp turns, accident-prone regions, and elevation changes. The goal is to provide actionable recommendations to minimize these risks, including speed regulations, driver warnings for hazardous zones, and the option of alternate routes.

Compliance with the Road Transport Safety Policy (RTSP)

The report integrates RTSP provisions, including mandatory driving hours, rest periods, and nighttime driving restrictions. It ensures that drivers follow official guidelines, such as taking prescribed rest breaks and avoiding dangerous road conditions like poor visibility, heavy crowds, or high-traffic areas during peak hours.

Emergency Preparedness and Response

The report highlights the significance of predetermined emergency stops for refueling, rest, and overnight stays. It includes protocols for safe responses to road hazards, alternative routes, and rerouting processes if roads are closed or severe weather arises. This aligns with the RTSP emphasis on driver safety and rapid emergency response.

Environmental Considerations

The JRM report addresses environmental risks along the route, ensuring compliance with environmental protection laws in ecologically sensitive zones. It suggests strategies such as identifying areas near water bodies, forests, or populated regions and implementing safety measures to minimize environmental impacts during transport.

Journey Risk Mitigation

The report includes route-specific risk assessments, detailed journey charts, and defensive driving guidelines for each transport route. Integration with vehicle tracking systems guarantees real-time warnings on hazardous areas, speed limits, and mandatory stops, consistent with RTSP and CMVR safety norms.

Compliance with Government Directives

This report fully adheres to governmental directives regarding hazardous material transportation, implementing mandatory speed limits, nighttime driving restrictions, and comprehensive driver briefings and real-time alerts about route-related risks.

Route Summary:
Total Distance: 97.78 km
Estimated Duration: 2.4 hours
Adjusted Duration (Heavy Vehicle): 3.0 hours

Start: (11.4381, 77.8734)
End: (11.982729, 78.250069)

Welcome to the Journey Risk Management Study

1. Overview of the Route Map

The route from Sangagiri to Bommidi spans about 97.78 kilometers and includes segments of Bhavani Main Road, SH 86, and passes through notable towns such as Padaiveedu, Ayveli, Erumaipatti, and Salem. The primary highways provide relatively direct connections with diversions through local roads.

2. Typical Weather Conditions and Potential Weather-Related Hazards

Tamil Nadu generally experiences tropical weather conditions. The route is susceptible to monsoon rains typically between June and September, which can lead to slippery roads and reduced visibility. During summer, heat can affect vehicle performance, especially in areas lacking shade or cooling facilities.

3. Analysis of Traffic Patterns

- Sangagiri to Salem:** Moderate traffic with potential congestion near urban centers.
- Salem:** Experiences heavy congestion, particularly during morning (8 AM - 10 AM) and evening (5 PM - 7 PM) peak hours.
- Salem to Bommidi:** Traffic generally flows smoothly, but expect slow movement through smaller towns.

4. Assessment of Road Quality and Infrastructure

- Bhavani Main Road & SH 86:** Generally well-maintained but may have sections under repair.
- Local Roads:** Vary in quality; some smaller connections may have poor surfaces and limited signage.

5. Suggestions for Alternative Routes for Emergencies

- In case of major incidents or closures on SH 86, consider NH 44 as an alternative for regional bypassing, although this might add considerable distance.
- Local diversions through smaller roads can provide temporary relief but may lack necessary support facilities.

6. Summary of Local Regulations Affecting Hazardous Material Transport

Tamil Nadu imposes regulations for the transportation of hazardous materials, including vehicle documentation, route approvals, and time restrictions. Ensure compliance with local diesel emission standards and proper handling certifications.

7. Overview of Historical Incidents

There have been occasional reports of accidents involving heavy vehicles in the Salem region, often linked to speeding and poor weather. Records specifically involving hazardous materials are sparse but underscore the importance of careful adherence to safety protocols.

8. Environmental Considerations and Sensitive Areas

- Several sections pass agricultural lands and water bodies, requiring caution to prevent contamination.
- Salem is an urban area with air quality management concerns, mandating reduced emissions.

9. Analysis of Communication Coverage

- Generally solid communication coverage in urban regions like Salem.
- Rural sections, particularly near Erumaipatti, might experience occasional network drops.

10. Estimated Emergency Response Times

- **Sangagiri to Salem:** Approximately 30-45 minutes.
- **Salem Urban Area:** 15-20 minutes.
- **Salem to Bommidi:** 45-60 minutes depending on proximity to smaller townships.

12. Overall Summary of Risk Assessment

The route presents a manageable risk level for hazardous material transport but requires attention to monsoon-related hazards, urban traffic in Salem, and compliance with local regulations. Coordination with local emergency services is advised to enhance response times in rural areas. Communication coverage is generally sufficient, with minor anticipated interruptions. Routine checks on vehicle and load conditions, adherence to safe speeds, and consideration of traffic patterns are critical to minimizing risks.

Key Recommendations: Ensure vehicles are well-equipped for varied weather, plan trips around peak congestion, maintain full compliance with transport regulations, and establish clear communication protocols for emergency situations.

Risk Assessment - Turns

	Risk Type	Risk Level	Coordinates	Speed Limit
0	Turn	High	11.43968, 77.87345	15 KM/Hr
