JOURNEY RISK MANAGEMENT (JRM) STUDY

Salem Terminal to MADESHWARA AGENCY

Objective of the JRM Report

This JRM report is designed to ensure compliance with the Central Motor Vehicle Rules, 1989 (CMVR), AIS 140 standards, and the Road Transport Safety Policy (RTSP). It provides a comprehensive risk assessment for the transportation of hazardous materials along specified routes. By integrating these legal frameworks, the report offers a broad strategy for identifying and mitigating route-specific risks.

Regulatory Compliance

The report complies with the Central Motor Vehicles (Eleventh Amendment) Rules, 2022, mandating safe transportation practices for N2 and N3 category vehicles carrying hazardous materials. These rules require detailed route assessments, especially regarding road conditions, speed limits, and risk areas, to ensure safety compliance.

Risk Management Strategy

This report categorizes transportation routes into high-risk and medium-risk areas, with a focus on factors such as sharp turns, accident-prone regions, and elevation changes. The goal is to provide actionable

recommendations to minimize these risks, including speed regulations, driver warnings for hazardous zones, and the option of alternate routes.

Compliance with the Road Transport Safety Policy (RTSP)

The report integrates RTSP provisions, including mandatory driving hours, rest periods, and nighttime driving restrictions. It ensures that drivers follow official guidelines, such as taking prescribed rest breaks and avoiding dangerous road conditions like poor visibility, heavy crowds, or high-traffic areas during peak hours.

Emergency Preparedness and Response

The report highlights the significance of predetermined emergency stops for refueling, rest, and overnight stays. It includes protocols for safe responses to road hazards, alternative routes, and rerouting processes if roads are closed or severe weather arises. This aligns with the RTSP emphasis on driver safety and rapid emergency response.

Environmental Considerations

The JRM report addresses environmental risks along the route, ensuring compliance with environmental protection laws in ecologically sensitive zones. It suggests strategies such as identifying areas near water bodies, forests, or populated regions and implementing safety measures to minimize environmental impacts during transport.

Journey Risk Mitigation

The report includes route-specific risk assessments, detailed journey charts, and defensive driving guidelines for each transport route. Integration with vehicle tracking systems guarantees real-time warnings on hazardous areas, speed limits, and mandatory stops, consistent with RTSP and CMVR safety norms.

Compliance with Government Directives

This report fully adheres to governmental directives regarding hazardous material transportation, implementing mandatory speed limits, nighttime driving restrictions, and comprehensive driver briefings and real-time alerts about route-related risks.

Route Summary:
Total Distance: 110.38 km
Estimated Duration: 2.4 hours
Adjusted Duration (Heavy Vehicle): 3.0 hours
Start: (11.4381, 77.8734)
End: (12.181293, 78.127879)

Welcome to the Journey Risk Management Study

Route Overview:

The route from CVQF+23W in Sangagiri to 54JH+G5 Mallikuttai spans approximately 110.38 km, primarily following state highways and main roads in Tamil Nadu. The journey typically takes around 2.39 hours for heavy vehicles.

1. Typical Weather Conditions:

The region generally experiences a tropical climate with hot summers, mild winters, and moderate to heavy monsoon rains. Potential weather-related hazards include:

- **Rainy Season (June to September):** Risk of flooding and reduced visibility.
- **Summer (March to June):** High temperatures could affect vehicle performance.

2. Traffic Patterns:

- **Peak Hours:** Typically occur in the morning (8 AM - 10 AM) and evening (5 PM - 8 PM).
- **Congestion-Prone Areas:**
 - Sankari RS - Erode Privu Rd.
 - Bhavani Main Road through Sankari West and Padaiveedu.

3. Road Quality and Infrastructure:

- Most roads are two-lane highways with varying road quality.
- Potholes and uneven surfaces may be prevalent, especially post-monsoon.
- Signage may be inadequate in rural stretches.

4. Alternative Routes:

In case of emergencies, major detours could include:

- Use of NH544 connecting Salem and Coimbatore for quicker access to bigger towns and infrastructure.

5. Local Regulations:

- Restrictions on hazardous material transportation may apply, particularly during nighttime or in certain populated regions.
- Specific permits may be required, enforced by local transport authorities.

6. Historical Incidents:

- While detailed incident records may not be publicly available, heavy vehicle accidents often occur due to overtaking, speeding, and road quality.

7. Environmental Considerations:

- Local wildlife and vegetation zones may require reduced speeds and caution.
- Areas near water bodies, especially during monsoons, may become sensitive to environmental protection rules.

8.Communication Coverage:

- Urban areas along the route have good mobile network coverage.
- Some rural stretches might experience coverage gaps; satellite-based communication tools are advisable for uninterrupted contact.

9.Emergency Response Times:

- Urban and suburban areas could have response times of around 15-30 minutes due to proximity to hospitals and fire stations.
- Rural and remote segments may face delays up to an hour or more.

10.Overall Risk Assessment:

- **Moderate Risk:** Due to traffic patterns, road quality, and moderate weather variance.
- **Key Risk Factors:** Weather conditions during rainy seasons, traffic congestion, and infrastructure variability.
- **Recommendations:** Enhanced driver training on route adaptability and safety protocols, utilizing technology for real-time weather and traffic updates, and ensuring compliance with local transport regulations.

It is critical for drivers transporting hazardous materials to adhere to safety regulations, maintain caution through variable road conditions, and remain informed about local traffic and weather updates.

Risk Assessment - Turns

	Risk Type	Risk Level	Coordinates	Speed Limit
