JOURNEY RISK MANAGEMENT (JRM) STUDY

Salem Terminal TO VARUN FUEL AGENCY

Objective of the JRM Report

This JRM report is designed to ensure compliance with the Central Motor Vehicle Rules, 1989 (CMVR), AIS 140 standards, and the Road Transport Safety Policy (RTSP). It provides a comprehensive risk assessment for the transportation of hazardous materials along specified routes. By integrating these legal frameworks, the report offers a broad strategy for identifying and mitigating route-specific risks.

Regulatory Compliance

The report complies with the Central Motor Vehicles (Eleventh Amendment) Rules, 2022, mandating safe transportation practices for N2 and N3 category vehicles carrying hazardous materials. These rules require detailed route assessments, especially regarding road conditions, speed limits, and risk areas, to ensure safety compliance.

Risk Management Strategy

This report categorizes transportation routes into high-risk and medium-risk areas, with a focus on factors such as sharp turns, accident-prone regions, and elevation changes. The goal is to provide actionable

recommendations to minimize these risks, including speed regulations, driver warnings for hazardous zones, and the option of alternate routes.

Compliance with the Road Transport Safety Policy (RTSP)

The report integrates RTSP provisions, including mandatory driving hours, rest periods, and nighttime driving restrictions. It ensures that drivers follow official guidelines, such as taking prescribed rest breaks and avoiding dangerous road conditions like poor visibility, heavy crowds, or high-traffic areas during peak hours.

Emergency Preparedness and Response

The report highlights the significance of predetermined emergency stops for refueling, rest, and overnight stays. It includes protocols for safe responses to road hazards, alternative routes, and rerouting processes if roads are closed or severe weather arises. This aligns with the RTSP emphasis on driver safety and rapid emergency response.

Environmental Considerations

The JRM report addresses environmental risks along the route, ensuring compliance with environmental protection laws in ecologically sensitive zones. It suggests strategies such as identifying areas near water bodies, forests, or populated regions and implementing safety measures to minimize environmental impacts during transport.

Journey Risk Mitigation

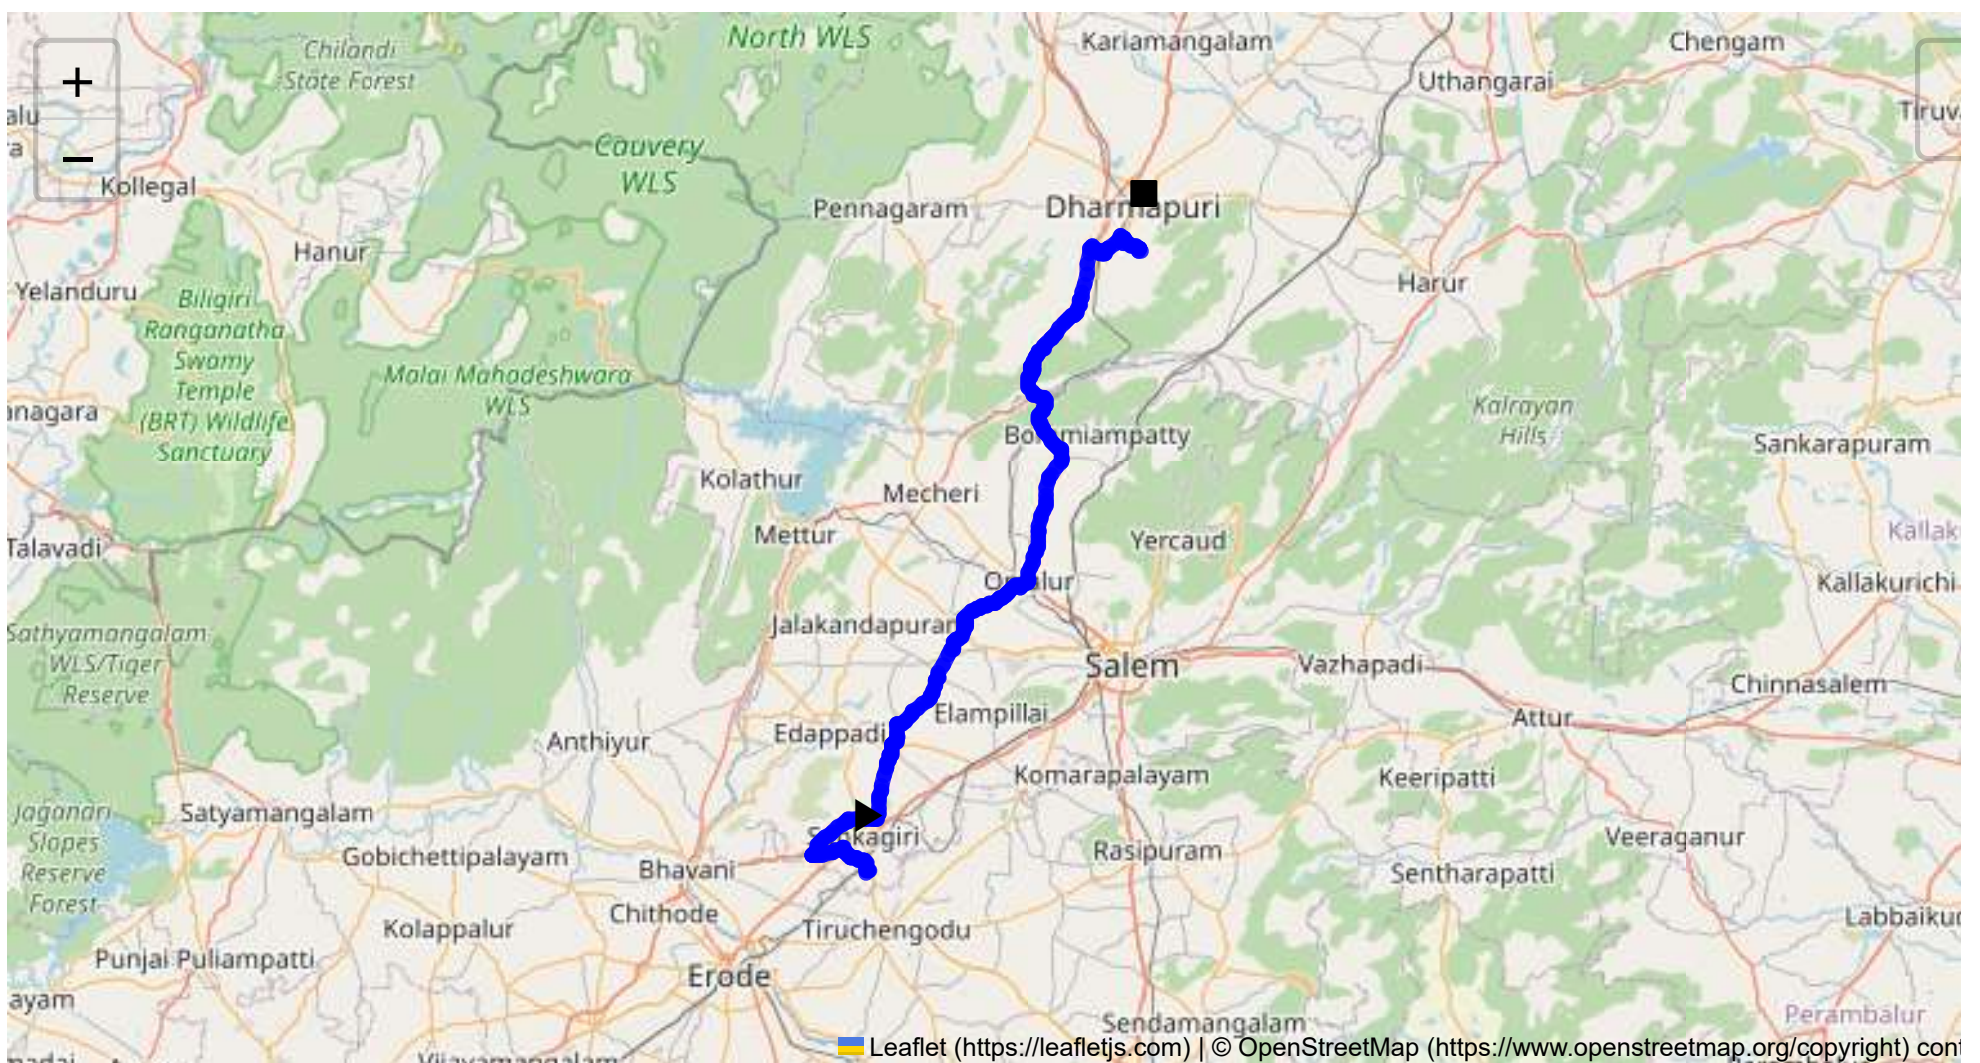

The report includes route-specific risk assessments, detailed journey charts, and defensive driving guidelines for each transport route. Integration with vehicle tracking systems guarantees real-time warnings on hazardous areas, speed limits, and mandatory stops, consistent with RTSP and CMVR safety norms.

Compliance with Government Directives

This report fully adheres to governmental directives regarding hazardous material transportation, implementing mandatory speed limits, nighttime driving restrictions, and comprehensive driver briefings and real-time alerts about route-related risks.

Route Summary:
Total Distance: 106.69 km
Estimated Duration: 2.4 hours
Adjusted Duration (Heavy Vehicle): 3.0 hours
Start: (11.4381, 77.8734)
End: (12.086688, 78.166412)

Welcome to the Journey Risk Management Study

Route Overview

The main route traverses multiple state highways and regional roads in Tamil Nadu, spanning various terrains and urban-rural landscapes. The total stretch is approximately 106.69 kilometers, often navigated by heavy vehicles, taking around 2.37 hours.

Weather Conditions

The region experiences a tropical climate, with high temperatures and humidity, particularly from March to June. Monsoon season from October to December can lead to heavy rainfall, potentially causing road flooding and landslides. Fog may occur during late nights and early mornings from December to February, affecting visibility.

Traffic Patterns

1. **Peak Hours:** Congestion is noticeable during early mornings (7-9 AM) and late afternoons (5-7 PM).
2. **Congested Areas:** Notably, Omalur and Salem city outskirts witness frequent traffic jams due to commercial activities and marketplaces.

Road Quality and Infrastructure

- Generally, the highways such as Salem-Kochi Hwy and NH 86 are in good condition, but connecting roads might be narrower and lesser maintained, especially in rural areas.
- Drive cautiously on narrower segments and unmarked curves.

Alternative Routes

In case of emergencies or blockades, rerouting via Salem-Attur or Salem-Tiruchengode highways, although longer, offer better infrastructure and safety.

Local Regulations on Hazardous Materials

Transport of hazardous materials needs to adhere to local and state transport laws, requiring appropriate permits and clearly marked vehicles. Nighttime transport may be restricted in certain municipalities.

Historical Incidents

While there are no recent major incidents reported in the public domain, minor accidents due to road conditions and weather are noted, mainly involving improper cargo management rather than the route itself.

Environmental Considerations

The route passes near agricultural zones and small water bodies; spillage or leaks can impact these sensitive areas. Certain zones may restrict access for heavy vehicles during specific harvest periods.

Communication Coverage

- **Dead Zones:** Remote stretches, especially between hills, might face connectivity issues. It is advisable to carry network-enhancing devices.

Emergency Response Times

- Response varies greatly across the route; urban areas like Salem offer rapid assistance (<15 minutes), whereas, in rural areas, it might extend up to 45 minutes.

Overall Summary

- **Risk Assessment:** The route presents moderate risk levels, manageable with proper precautions.
 - **Weather impact:** High in monsoon.
 - **Traffic congestion:** Manageable but requires planning around peak hours.
- Enhanced safety measures include planning for weather changes, avoiding peak times, ensuring up-to-date communication devices, and familiarizing with alternative routes and emergency contacts.

Drivers should remain vigilant and regularly monitor weather and traffic updates for a safer transit experience.

Risk Assessment - Turns

	Risk Type	Risk Level	Coordinates	Speed Limit
0	Turn	High	11.43961, 77.87341	15 KM/Hr
